

Creating Vet Care Case Plan Templates

Vet Care Case Templates are a fast and convenient way to ensure that common veterinary care cases are created quickly, and animals are treated consistently. Follow the below steps to create Plan Templates in your system.

1. Under the Action List for the Vet Care Application select Setup Vet Care Dictionaries.

2. Once in the Setup Vet Care Lists (Dictionaries) page select Plan Templates. This will bring you to the Plan Templates page where you can add a template using the add feature at the bottom of the grid.

- Clicking add with take you to the Add Record page where you can choose the plan category and then input the Plan Short Description, Plan Long Description, and the Default Plan Summary. The Default Plan Summary will appear in the Plan Summary of the case when the template is chosen for use. Save your record when complete.
